Engineering Leader | AI Developer Tools & Developer Experience | Automation, Internal Tooling & Engineering Efficiency at Scale

SUMMARY

Engineering leader with 15+ years across AI and developer tools, boosting engineering efficiency through automation and internal tooling. I've standardized AI-assisted development across the org (Cursor, Claude Code, GitHub Copilot), shipped production AI agents and MCP servers as internal developer tools, and built the platforms, CI/CD, and self-service tooling that let teams move faster. I lead and mentor engineering teams, define and prioritize roadmaps, manage cross-organization dependencies for developer experiences, and shape architecture and execution quality — while keeping products secure and compliant (ISO 27001, SOC 2). I turn intricate requirements from product, operations, and business into practical technology, and I stay hands-on in Python and JavaScript/TypeScript.

EXPERIENCE

CruxOCM Inc. — VP of Engineering / Head of Automation (reporting to the CTO) · Feb 2025 – Present

- **Leadership, mentoring & roadmap:** Lead and mentor engineering teams with performance guidance; define and prioritize the roadmap with product, operations, and business; manage cross-organization dependencies and turn intricate requirements into practical technology solutions.
- **AI developer tools & engineering efficiency:** Boost engineering efficiency through automation and internal tools — standardized Cursor/Claude Code + GitHub Copilot for AI-assisted development and PR review, and built internal developer tools including production AI agents on GCP ADK (miniBOT) and reusable MCP servers, plus self-service automation frameworks that eliminate manual toil.
- **Data & AI capabilities:** Delivered AI capabilities on data — miniBOT, a Gemini multi-agent assistant grounded by RAG over BigQuery vector embeddings on Vertex AI; TestBOT, which auto-generates tests; and IAH, a multi-tenant B2B SaaS AI platform sold to external business customers.
- **Architecture & execution quality:** Shape architecture and execution quality — standardized Kubernetes across GCP and Azure, CI/CD (GitHub Actions, Jenkins, Bazel monorepo, Gradle) with release governance, and DORA metrics with dashboards driving scalable, high-quality delivery.
- **Security & compliance:** Ensure products meet security and regulatory requirements — ISO 27001 and SOC 2 (audit ownership), SBOM, static-analysis scanning, and access-control standards for a safety-critical, regulated platform.
- **Cross-functional partnership:** Partner across engineering, product, operations, and business with strong communication; own ~$2M cloud spend with >$200K saved.

Insulet Corporation (FDA-regulated medical devices) — Sr. Cloud Engineering Manager · Dec 2022 – Feb 2025

- Led cloud and data-product teams (25–30 engineers) across DevOps, developer productivity, and performance engineering; partnered with the VP of Engineering on multi-year roadmaps and quarterly OKRs.
- Owned end-to-end CI/CD with gating and one-button deploy (Jenkins, Python, Gradle); operated highly available Jenkins on EKS/EFS (99.9% uptime) and cut deployment errors 15%.
- Built a performance and load-testing framework (Locust, Python) on EKS/AWS (25% improvement); implemented SBOM generation and regulated change control for data integrity and supply-chain security.

Amazon (AWS Redshift) — Lead Systems Engineer · Dec 2016 – Dec 2022

- Owned the build, CI/CD, release ecosystem, and internal developer tooling for Redshift — one of AWS's largest-scale distributed data services — including the CI/CD servers and fully automated build/deploy across all AWS-supported regions.
- Led the team that designed and shipped a Bors-style automated merge queue, gating integration on the exact merge candidate (not just the feature branch) — eliminating broken-mainline incidents and boosting engineering efficiency org-wide.
- Added metrics-driven reporting on pipeline health and developer productivity, making bottlenecks visible and driving continuous improvement across the developer workflow.

Prosper Marketplace (regulated fintech) — Lead DevOps Engineer · Jan 2015 – Dec 2016

- Rolled out org-wide CI/CD with Jenkins and containerization with Docker; managed Artifactory artifact/versioning, SonarQube static-analysis quality gates, and a Hadoop cluster on AWS (EMR).

Pivotal Software — Member of Technical Staff · Sep 2011 – Jan 2015

- Managed CI infrastructure and agents; migrated Perforce to Git with enforced branching/merge policy; automated Coverity static analysis and code-coverage; built dynamic provisioning of Linux environments on AWS and vCloud.

OPEN SOURCE

UniClaw · github.com/uniclaw-labs/uniclaw

- Architected and shipped UniClaw, an open-source AI agent platform — Claude-powered agents on a FastAPI (Python) backend and a React / **JavaScript / TypeScript** app, with a pluggable provider/tool registry (27+ integrations) and a security-first design (OAuth2 with scoped JWTs, Fernet-encrypted secrets, non-root containers); 4,400+ automated tests across a polyglot codebase. Also publish an open-source Lever MCP server.

EDUCATION

- M.S., Software Engineering, San Jose State University (2011)
- B.E., Computer Engineering, Gujarat University (2009)

SKILLS & TOOLS

- **AI Developer Tools:** AI-assisted development (Cursor, Claude Code, GitHub Copilot); AI agents (GCP ADK) & MCP servers as internal tools; LLM/GenAI integration; RAG / retrieval (Vertex AI); enterprise AI rollout (Gemini Enterprise)
- **Automation & Engineering Efficiency:** Internal developer tools & platforms; automation frameworks; self-service environments; CI/CD (GitHub Actions, Jenkins, Bazel monorepo, Gradle); merge-queue & release governance; DORA metrics & developer productivity
- **Architecture & Delivery:** Scalable technology delivery; architecture & execution quality; Kubernetes (EKS/GKE/AKS); Docker; Terraform; AWS, GCP, Azure; observability (Grafana LGTM / OpenObserve, PagerDuty), SLOs & 99.99% reliability
- **Data & AI Capabilities:** Multi-agent systems; data platforms (BigQuery, Redshift, Hadoop); multi-tenant B2B SaaS AI platform (IAH)
- **Security & Compliance:** ISO 27001 / SOC 2 (audit ownership); SBOM & static-analysis scanning; access control & encrypted secrets
- **Leadership:** Leading & mentoring teams; performance guidance; roadmap definition & prioritization; cross-organization collaboration; Agile; stakeholder communication
- **Languages:** Python; JavaScript / TypeScript; Java/C/C#; Bash; SQL/NoSQL (MySQL, PostgreSQL, Oracle, DynamoDB)
