Infrastructure & Platform Engineering Leader | Distributed Systems, Kubernetes & SRE at Scale | Multi-Domain Org Leadership

SUMMARY

Infrastructure and platform engineering leader with 15+ years owning the reliability, scalability, and efficiency of production systems and the organizations behind them. Set multi-year infrastructure strategy and lead across platform engineering, SRE, data, and cloud infrastructure — architecting multi-region distributed systems and Kubernetes control planes at 99.99% availability, with SLO governance and deep observability. Own large-scale data and database platforms (AWS Redshift, Hadoop/HDFS, SQL/NoSQL) and MLOps/AI-ML platforms, along with multi-million-dollar budgets and vendor strategy. Partner with the C-suite to translate technical constraints into business impact, investment, and risk — and build accountability-driven engineering cultures that deliver measurable outcomes in availability, latency, and cost.

EXPERIENCE

CruxOCM Inc. — VP of Engineering / Head of Automation (reporting to the CTO) · Feb 2025 – Present

- **Infrastructure strategy & multi-domain org:** Own the multi-year infrastructure and engineering strategy and lead teams across platform engineering, DevOps/SRE, infrastructure, security, and quality; establish an accountability-driven operating cadence and align technical goals to business outcomes with the CEO and CTO.
- **Distributed systems & Kubernetes:** Architected multi-region services and standardized Kubernetes as the control plane across GCP and Azure — multi-cluster, GitOps-governed, with self-service primitives and fault isolation; 99.99% availability.
- **SRE, reliability & observability:** Own platform observability and reliability — Grafana LGTM / OpenObserve with PagerDuty on-call, SLO governance, and incident command turning operational learnings into systemic prevention.
- **Data & AI/ML platforms:** Built data and retrieval platforms and MLOps/LLMOps for production AI/ML workloads (multi-agent runtimes, RAG on Vertex AI over docs and tickets), supporting the data and AI/ML platform layer.
- **Budget, vendor & efficiency:** Own a $2–3M budget including ~$2M cloud spend across GCP and Azure plus vendor strategy; drove >$200K in savings through right-sizing and automation — measurable efficiency at the platform level.

Insulet Corporation (FDA-regulated medical devices) — Sr. Cloud Engineering Manager · Dec 2022 – Feb 2025

- Led cloud and data-product teams (25–30 engineers) across DevOps, developer productivity, and performance engineering; partnered with the VP of Engineering on multi-year roadmaps and quarterly OKRs.
- Owned end-to-end CI/CD; operated highly available Jenkins on EKS/EFS (99.9% uptime) and reduced deployment errors 15%.
- Built a performance and load-testing framework (Locust, Python) on EKS/AWS driving a 25% improvement in cloud architecture performance.
- Implemented SBOM generation and security automation across ~25 microservices, supporting a regulated data-product platform.

Amazon (AWS Redshift) — Lead Systems Engineer · Dec 2016 – Dec 2022

- Owned the build, CI/CD, release ecosystem, and test tooling for Redshift — one of AWS's largest-scale distributed data platforms — with CI/CD servers and fully automated, multi-region build/deploy across all AWS-supported regions.
- Led the team that designed and shipped a Bors-style automated merge queue (gating integration on the exact merge candidate) with metrics-driven reporting — eliminating broken-mainline incidents and unblocking developer velocity org-wide.

Prosper Marketplace (regulated fintech) — Lead DevOps Engineer · Jan 2015 – Dec 2016

- Ran a Hadoop/HDFS cluster on AWS (EMR) for large-scale data processing; rolled out org-wide CI/CD and containerization; managed microservice versioning (Artifactory) and static-analysis code quality (SonarQube).

Pivotal Software — Member of Technical Staff · Sep 2011 – Jan 2015

- Managed CI infrastructure and agents; migrated Perforce to Git; automated static analysis and code-coverage; built dynamic provisioning of Linux environments across AWS and vCloud.

OPEN SOURCE

UniClaw · **github.com/uniclaw-labs/uniclaw**

- Architected and shipped UniClaw, an open-source AI agent platform for connected vehicle control — a multi-provider framework supporting 27+ vehicle brands (Tesla, BMW, Ford, Rivian) with natural language commands via 12 messaging channels (WhatsApp, Telegram, Slack) and voice assistants (Alexa, Google Home), built on Claude-powered agents, FastAPI, and a Tauri/React desktop app.
- Designed a security-first architecture for sensitive vehicle credentials: an OAuth2 authorization server with scoped JWTs, automatic Fernet encryption of secrets, constant-time token validation, and non-root containers — patterns transferable to SOC 2 / ISO 27001 environments.
- Delivered production-grade quality across a polyglot codebase (Python, TypeScript, Rust): 4,400+ automated tests, pluggable provider/channel adapters, Dockerized multi-service orchestration, and three AI backends (Anthropic API, local Ollama, zero-cost command mode).

EDUCATION

- M.S., Software Engineering, San Jose State University (2011)
- B.E., Computer Engineering, Gujarat University (2009)

SKILLS & TOOLS

- **Infrastructure & Platform Engineering:** Multi-region distributed systems; Kubernetes at scale (GKE, EKS, AKS — multi-cluster, GitOps, self-service primitives); Terraform; AWS, GCP, Azure; fault isolation & automated recovery
- **Reliability & SRE:** SLO governance; observability (Grafana LGTM / OpenObserve, PagerDuty); incident management & systemic remediation; 99.99% availability; performance engineering (Locust)
- **Data, Storage & Databases:** Large-scale distributed data platforms (AWS Redshift); Hadoop/HDFS (EMR); SQL & NoSQL (MySQL, PostgreSQL, Oracle, DynamoDB); data durability & performance
- **AI/ML Platforms:** MLOps/LLMOps; production AI/ML runtimes & retrieval (GCP ADK, Vertex AI); enterprise LLM rollout (Gemini Enterprise); AI-assisted engineering (Cursor, Claude Code)
- **Leadership & Strategy:** Multi-year infrastructure roadmaps; scaling & leading multi-domain organizations; $2–3M budget & vendor strategy; executive / C-suite communication; OKRs & accountability culture; security & compliance (ISO 27001, SOC 2)
- **Software:** Python; Java/C/C#; Shell; API design
