Engineering Leader | DevOps, CI/CD & Platform at Scale | AI-Driven Automation, MLOps & Engineering Excellence

SUMMARY

Engineering leader with 15+ years building and operating enterprise CI/CD platforms and DevOps organizations — and driving the AI transformation of engineering itself. Architected large-scale, multi-repo CI/CD at AWS (including a Bors-style merge queue and metrics-driven developer productivity), and brought AI into the workflow: an org-wide Gemini Enterprise rollout, production AI agents, and standardized Cursor/Claude Code with automated PR review. Champion engineering excellence — coding standards, MLOps/LLMOps, test automation, release governance, and performance — measured as DORA metrics and dashboards. Run reliability and operations with observability (Grafana LGTM / OpenObserve, PagerDuty), SLOs, and blameless incident/RCA across AWS, GCP, and Azure on Kubernetes and Terraform. Hands-on in Python; build and mentor high-performing teams; and partner cross-functionally to raise DevOps maturity and turn AI into measurable productivity.

EXPERIENCE

CruxOCM Inc. — VP of Engineering / Head of Automation (reporting to the CTO) · Feb 2025 – Present

- **AI-driven engineering transformation & excellence:** Defined and executed the org's enterprise AI strategy — org-wide Gemini Enterprise rollout, standardized Cursor/Claude Code + Copilot PR review, and agent/MCP frameworks — turning AI into measurable engineering productivity; championed engineering-excellence standards and MLOps/LLMOps across the SDLC.
- **CI/CD, automation & release governance:** Own CI/CD across GitHub Actions, Jenkins, Bazel (monorepo), and Gradle with pipeline gating, self-service ephemeral environments, and release governance; built automation frameworks for build, test, release, and infrastructure orchestration.
- **AI/ML-driven automation & agents:** Shipped production AI agents on GCP ADK — miniBOT, a Gemini multi-agent assistant grounded by RAG over vector embeddings, and TestBOT, a Gemini agent that auto-generates tests — plus MCP servers, applying AI-driven automation and observability to pipelines and operations.
- **Reliability, observability & incident management:** Standardized Kubernetes across GCP and Azure at 99.99% with observability (Grafana LGTM / OpenObserve, PagerDuty), SLOs, and blameless incident/RCA; owned ~$2M cloud spend with >$200K saved.
- **Metrics, security & compliance:** Ran developer productivity as metrics (DORA, PR throughput) with dashboards from PR to executive review; SBOM and static-analysis security scanning; ISO 27001 and SOC 2 (audit ownership).
- **Team & cross-functional leadership:** Hire, mentor, and grow a distributed engineering org; foster technical excellence and continuous improvement; partner across product, engineering, and business leaders.

Insulet Corporation (FDA-regulated medical devices) — Sr. Cloud Engineering Manager · Dec 2022 – Feb 2025

- Led cloud and data-product teams (25–30 engineers) across DevOps, developer productivity, and performance engineering; partnered with the VP of Engineering on multi-year roadmaps and quarterly OKRs.
- Owned end-to-end CI/CD with gating and one-button deploy (Jenkins, Python, Gradle); operated highly available Jenkins on EKS/EFS (99.9% uptime) and cut deployment errors 15%.
- Built a performance and load-testing framework (Locust, Python) on EKS/AWS (25% improvement); implemented SBOM generation and regulated change control for data integrity and supply-chain security.

Amazon (AWS Redshift) — Lead Systems Engineer · Dec 2016 – Dec 2022

- Owned the build, CI/CD, release ecosystem, and test tooling for Redshift — one of AWS's largest-scale distributed data services — including the CI/CD servers and fully automated build/deploy across all AWS-supported regions.
- Led the team that designed and shipped a Bors-style automated merge queue, gating integration on the exact merge candidate (not just the feature branch) — eliminating broken-mainline incidents and unblocking developer velocity org-wide.
- Added metrics-driven reporting on pipeline health and developer productivity, making bottlenecks visible and driving continuous improvement across the developer workflow.

Prosper Marketplace (regulated fintech) — Lead DevOps Engineer · Jan 2015 – Dec 2016

- Rolled out org-wide CI/CD with Jenkins and containerization with Docker; managed Artifactory artifact/versioning and SonarQube static-analysis quality gates on AWS.

Pivotal Software — Member of Technical Staff · Sep 2011 – Jan 2015

- Managed CI infrastructure and agents; migrated Perforce to Git with enforced branching/merge policy; automated Coverity static analysis and code-coverage; built dynamic provisioning of Linux environments on AWS and vCloud.

OPEN SOURCE

UniClaw · github.com/uniclaw-labs/uniclaw

- Architected and shipped UniClaw, an open-source AI agent platform for connected vehicle control — a multi-provider framework supporting 27+ vehicle brands via 12 messaging channels and voice assistants, built on Claude-powered agents, a FastAPI (Python) backend, and a Tauri desktop app in React and TypeScript.
- Designed a security-first architecture: OAuth2 authorization server with scoped JWTs, rate limiting, Fernet-encrypted secrets, and non-root containers; 4,400+ automated tests across a polyglot codebase (Python, TypeScript, Rust) with Dockerized orchestration.

EDUCATION

- M.S., Software Engineering, San Jose State University (2011)
- B.E., Computer Engineering, Gujarat University (2009)

SKILLS & TOOLS

- **DevOps, CI/CD & Automation:** Enterprise CI/CD platforms (GitHub Actions, Jenkins, Bazel monorepo, Gradle); multi-repo build/test/release automation; merge-queue & branching strategies; artifact management (Artifactory) & release governance; SBOM & supply-chain security; Linux
- **AI-Driven Automation & Transformation:** Enterprise AI rollout (Gemini Enterprise); AI-driven pipeline automation & observability; agents (GCP ADK) & MCP; RAG / vector retrieval; AI-assisted development (Cursor, Claude Code, GitHub Copilot); MLOps/LLMOps
- **Reliability & Operations:** Observability (Grafana LGTM / OpenObserve, PagerDuty); SLOs; incident management & RCA; 99.99% reliability; performance optimization; DORA metrics & dashboards
- **Platform & Cloud:** AWS, GCP, Azure; Kubernetes; Docker; Terraform; distributed systems at scale
- **Leadership:** Building & mentoring DevOps/engineering teams; DevOps maturity & standards; cross-functional & executive stakeholder alignment; roadmaps & OKRs
- **Software & Data:** Python; Bash; TypeScript; Java/C/C#; SQL/NoSQL (MySQL, PostgreSQL, Oracle, DynamoDB); API design
